PROFILE

Full Stack Developer with 2 years of professional experience building scalable web applications using React, Next.js, TypeScript, Node.js, PHP, and Laravel. Experienced in REST API integration, authentication, database design, and collaborating with international clients in Agile environments. Passionate about delivering clean, maintainable code and continuously learning modern technologies.

PROFESSIONAL EXPERIENCE

Full Stack Developer - Kalipto Construction

2025 - 2026

- Developed and maintained 5+ responsive web applications using Next.js, React.js, TypeScript, and Tailwind CSS, while designed reusable components and modular application structures that accelerated feature development across multiple projects.
- Designed website and application interfaces with attention to usability, visual consistency, and client requirements.
- Monitored company social media accounts and kept track of account activity, updates, and engagement.
- Integrated Firebase Authentication, REST APIs, and cookie-based session management for secure user authentication and data handling.
- Built and integrated business process automations using n8n, APIs, webhooks, email notifications, Google Sheets, and third-party services.
- Developed CRM and workflow automations for lead management, follow-ups, data synchronization, notifications, and repetitive administrative processes.
- Improved application performance through code optimization, component refactoring, and efficient state management and configured Progressive Web App (PWA) support with Workbox and Next-PWA to enhance reliability and offline accessibility.
- Worked closely with clients and team members throughout development, from requirements gathering to deployment and post-launch support.
- Maintained clean, scalable, and well-documented TypeScript code while troubleshooting production issues and implementing new features.

Full Stack Developer - Bluebeans System Inc.

2024 - 2025

- Developed and maintained 2 responsive web applications using React.js and Tailwind CSS.
- Reduced page load time by 30% through code optimization and debugging.
- Implemented reusable components, improving development speed by 25%.
- Collaborated with a 6-member team to enhance features and user experience.
- Wrote clean, scalable code in TypeScript, increasing app stability and reducing bugs.
- Contributed to project planning and sprint reviews, improving team workflow.

EDUCATION

Bachelor Of Computer Science

2021 - 2025

Negros Oriental State University

PROFESSIONAL SKILLS

- **Programming Languages:** HTML, CSS, Javascript, C++, Java, PHP, Python, Typescript
- **Frameworks & Libraries:** React.js, React Native, Tailwind CSS, Laravel, Next.js, Firebase Authentication, Rest APIs
- **Automation & Integrations:** n8n, Workflow Automation, CRM Automation, API Integrations, Webhooks, Email Automation, Google Sheets Automation, Lead Management Automation
- **Tools & Platforms:** Git, GitHub, VS Code, npm, MySQL, Microsoft Word, Excel, PowerPoint, Photoshop, Capcut, Canva
- **Soft Skills:** Communication, Problem Solving, Organization, Adaptability, Critical Thinking, Team Collaboration, Time Management
